

# Points on the Plane

Write the letter of the point above its coordinates in the code below.

(5, 7) (3, 1) (9, 6) (3, 5) (2, 8) (6, 9) (9, 1) (1, 3) (0, 7) (6, 4) (7, 2) (8, 8) (4, 0) (6, 3)

## It's a fact...

The Cartesian coordinate system is named after René Descartes, a French mathematician who lived from 1596–1650. His work, along with that of another French mathematician, Blaise Pascal, did much to help develop the branch of mathematics called coordinate geometry. In coordinate geometry, algebra and geometry work together to create a mathematical “picture.”

## Multiplication Five Minute Frenzy (M)

Try to complete the chart in less than five minutes and score 98 out of 100 or better. Write the product of the column and row numbers in each space.

x	1	12	8	9	11	5	10	3	2	7
12										
4										
9										
2										
3										
1										
10										
7
